CHAPTER FOUR CHAPTER FOUR CHAPTER FOUR CHAPTER FOUR CHAPTER FOUR

Prime yields stabilise, further supported by gradual ERV growth

Prime yields have **broadly stabilised**, with some markets (i.e. Belgium) showing yield compression

Gradual prime rent evolution continues to support asset valuation

* Data from JLL, CBRE, Cushman & Wakefield

Muted recovery in tenant demand, supported by stabilising vacancy rates

Latest take-up figures indicate **muted recovery in tenant demand**, with brokers pointing to improving demand pipeline in H2

Market vacancy shows **stabilizing to mildly increasing trends**, driven by the diverging performance of A- and B-grade locations

European e-commerce growth story remains intact

With revenues projected to grow at 5.8% p.a. (2025-2028)

Source: ECBD

3PLs continue to lead expansionary demand, with Post & parcel delivery expressing intention to increase footprint

European e-commerce growth is expected to continue supporting warehouse demand, with **93,000 m² of new space needed per additional \$1bn of e-commerce sales***

Manufacturing companies are expected to continue rationalising footprint

*CBRE estimates

Location remains a pivotal factor in occupiers' decisions, woven into the broader cost consideration

Main factors in occupiers' general location decisions (2025 vs 2023)

Connectivity and grid power availability have become central in occupiers' warehouse location decisions, with **real estate costs** falling in importance following occupiers shifting towards a broader view on costs

Real estate availability, along with labour availability, have also become more critical to occupiers

Source: CBRE/Analytiqa European Logistics Occupier Survey - July 2025

Sustainable buildings to remain in occupier focus

% of occupiers' footprint that will become obsolete by 2030

Source: CBRE/Analytiqa European Logistics Occupier Survey - July 2025

Occupiers have **taken advantage** of **higher market supply** and **upgraded obsolete space**, reducing the average bigger share of space at risk of obsolescence

However, with only 5 years to go, **the flight to quality for sustainable buildings is expected to accelerate**, with 35% of occupiers believing that at least 25% (c. 23m m²) of their **footprint will become obsolete by 2030**
